

Minutes from CEESA WP2 Meeting

Date: 11 January 2007
Place: Tune Kursuscenter, Greve

Present:

Henrik Lund, AAU
Brian Vad Mathiesen, AAU
Georges Salgi, AAU
Mette Reiche Sørensen, AAU
John K. Pedersen, AAU
Mads Pagh Nielsen, AAU
Marie Münster, AAU/DTU-Risø
Niclas Scott Bentsen, KU-KVL
Claus Felby, KU-KVL
Kjeld Nørregaard, VE-Net

Discussion and decisions

The group listed a series of alternative transport technologies, i.e. electric cars, electric busses and trains, niche vehicles, biogas, fuel cells and hybrid-driven vehicles. What is the alternative to aeroplanes? Maybe high-speed trains?

The parameters of velocity and comfort were discussed and defined as relevant conditions for the selection of transport technologies. Two options were defined:

- 1) A scenario in which the transport services are the same as today.
- 2) A scenario in which velocity is reduced.

Claus Felby informed the group about the possibilities related to biomass resources and land use in Denmark.

The following decisions were made at the meeting:

- 1) Niclas will begin his Ph.d. by 1 April 2007
- 2) The work of WP2 will begin now:
 - a. John, Mads and Georges will define transport technologies.
 - b. Brian and Henrik will convert data into person/km.
 - c. Information on biomass for LCA will be given to WP4 and WP5
- 3) Next WP2 meeting will be held on 25 April 2007, 10:00 – 15:00
