

WP2 – Milestones

1/10 – First draft of inputs for Transport scenarios

- Biomass potential scenarios
- Biomass conversion technologies
- Prioritization table with area/PJ and el/steam efficiencies and total efficiencies
- Waste conversion technologies
- Synthetic fuels from electricity (methanol high priority)
- Overall discussion of the technical implications of changing infrastructure
- Up-date of existing data for vehicles, busses, trains and aviation
- Up-date of shift between different modes of transport.
- Up-date of data for road pricing

October meeting – new draft scenarios

Post October meeting

- Hearing of draft scenarios with other WPs
- Hearing of draft scenarios with experts

15/12 – more or less final report

- Draft report with several transport scenarios
- Precise description of one scenario
